

Make sure to follow the steps while submitting your assignment else you will lose marks if any of this is missing.

Step 1 : To write the code you can either use **Jupyter Notebook or Google Collab** editor. Make sure you **add comments** wherever necessary to make it more readable.

Step 2 : After you have finished writing your code **save your work** in **ipynb format** as Name_Surname_Assign1.

Step 3: **Create a word document** and answer every question in each of your assignments. Make sure to **attach screenshots of the output** received and **explain the results** obtained in few words. Save the document in pdf/word format.

Step 4: At the end, **create a file**, **add** your **code** (jupyter notebook), **csv file** used and **word/pdf document** and **zip it into one folder**. Save it as Name_Surname_Assign1.
